REVISION EYEWEAR JOB DESCRIPTION

Job Title: **INDUSTRIAL DESIGNER TECHNICIAN**
Department: Product
Reports To: Senior Industrial Designer
Location: Montreal, Canada
Hours/Days of Week: 8:30AM to 5:30PM (Monday through Friday)
Date: June 29, 2010

Passion drives Revision Eyewear.

Passion for designing and manufacturing the ultimate in military eye protection products.

Passion for setting the highest standards in engineering, and production. Passion to lead.

Revision Eyewear is looking for a passionate person to fill this Engineering position.

Revision Eyewear is the benchmark for the ultimate in eyewear protection for military, law enforcement, tactical officers and outdoorsmen. Revision's capability in providing protection, durability, optical clarity, comfort and style exceeds even the highest measures set by its military customers. The company's dedication to excellence has fueled its rapid growth in both international and domestic markets. Revision continues to hire best-in-class employees driven to make it the number one brand in military eyewear protection.

EMPLOYMENT OBJECTIVE

The Industrial Designer Technician is responsible managing the company technical drawings and CAD files on a day to day basis ensuring that they are up to date with proper revision number. Provide support to the engineering department for the preparation and production of product drawings and specification, and will be responsible for controlling and managing changes to the company's technical data. The candidate will need to be a customer oriented and creative self starter who can work in a dynamic and evolving team environment.

SPECIFIC ESSENTIAL FUNCTIONS

Drawing preparation:

- Extensive knowledge of standard drawing practices, specifically as it relates to product development in the plastic injection industry.
- Draw parts, sub-assemblies and assemblies (2D and 3D).
- Create specification sheets for products.
- Proficiency in the use of software tools such as Solidworks, Rhino and graphics software such as Adobe Illustrator and Photoshop.

Technical Data Management

- Capability to manage and control configuration of technical data.
- Manage material lists.
- Understand and have input into the Company's engineering database and bill of materials system.
- Implementing technical data management within the requirement of an Enterprise Resource Planning System.

KNOWLEDGE, SKILLS AND EXPERIENCE REQUIREMENTS

- CEGEP level (at minimum) draftsperson or industrial design certification.
- 5+ years of drafting experience.
- Knowledge of Solidworks, Rhino 3D, Adobe Illustrator, Photoshop.
- Knowledge of injection molding practices specifically with materials such as plastics or composites.
- Technical Data Management experience.
- Experience with production environment.
- Creative and ability to work autonomous and part of a team.
- Proficient in computer skills Microsoft Office (Word, Excel, PowerPoint, Outlook, Access) required.
- Strong English language, verbal communication and writing skills required.
- Knowledge of and experience of working with Military and Personal Protective Equipment Standards would be definite plus.

If you wish to be considered for this position, submit your resume/CV in confidence, noting the position to:
