REVISION EYEWEAR JOB DESCRIPTION

Job Title: LAB TECHNICIAN
Department: R&D Lab
Reports To: Lab Manager
Location: Essex Junction, VT
Date: February 2, 2010

PRIMARY EMPLOYMENT OBJECTIVE

Performs, evaluates and reports all testing activities, both internal and external, for existing Revision Eyewear products as well as testing to support Revision's RD&E projects. This position will insure prioritization of the workload is correct, that testing timelines are met; results are well documented and reported in appropriate format and timely fashion.

SPECIFIC ESSENTIAL FUNCTIONS

- Interface with Marketing, Sales, Operations and RD&E functions regularly to make certain testing requirements and priorities are understood.
- Evaluate results of product tests and inspections for compliancy.
- Also further evaluate passing product for aberrations or trends that may lead to failure in the future and initiate preventive actions as needed.
- Assist Marketing and Sales to determine compliancy to new standards and define customer requirements for certification.
- Ensure all lab equipment in the lab is appropriately maintained and calibrated.
- Ensure all necessary lab supplies and tools are stocked appropriately.
- Provide guidance to Lab customers regarding what testing is appropriate, and to assist in interpretation of testing results, to include suggestion to improve product performance as applicable.
- Develop strong knowledge of all standards and specifications which relate to our products.
- Train other Lab associate(s) on the proper use and maintenance of all lab equipment.
- Ensure all safety requirements for lab equipment are followed at all times.

KNOWLEDGE, SKILLS AND EXPERIENCE REQUIREMENTS

- Associate's degree in a technical discipline preferred or equivalent combination of education and experience.
- 3+ years experience in manufacturing and/or laboratory environment, protective eyewear experience a plus.
- Proficiency with Microsoft Office Suite (Microsoft Word, Excel, PowerPoint, Outlook and Project specifically).
- Position requires a person who is meticulous and quality conscious.
- Ability to manage multiple projects and prioritize in a shifting landscape.
- A can-do, customer-centric attitude is a necessity.
- Motivated and creative problem solver.
- Experience with analytical test equipment is a plus.
- Clear written and verbal communication skills.
- Fast learner with excellent time management skills.
- Ability to work in a team environment.
