Rx FULFILLMENT FREQUENTLY ASKED QUESTIONS (FAQ) & IMPORTANT INFORMATION

FAQ

Q: Can I send my Optometrist's prescription instead of completing the attached form?

A: Yes. However, please provide all shipping and billing information.

Q: What type of lens material will be used for the prescription lenses?

A: Revision will fill single vision prescriptions using polycarbonate lenses within the Rx carrier to ensure the same protective capabilities as the eyewear. However, other material, such as CR-39, can also be used but must be specified by the customer if required.

Q: What is Pupillary Distance (PD) and why do I need to include my PD on the order form?

A: PD is the distance (in mm) from the center of the pupil in the right eye to the center pupil of the left eye. It is required information to ensure the correct positioning of the lenses within the frame.

Q: How long does it take to receive my filled prescription carrier?

A: Delivery time is approximately 4 weeks for Rx carriers.

Q: What should I do if I am unhappy with the filled prescription lens?

A: Due to the wrap associated with the Ballistic Eyewear, some customers may not be able to wear a sport wrap prescription. If this is the case and the order is returned within 2 months of receiving the eyewear, 50% of the original cost will be returned to the customer.

Please note: Revision is not responsible for incorrectly-entered prescription information. When submitting your order, please type the information to ensure legibility and double check it against your prescription information.

Please include a copy of your current optical prescription with your order to ensure accuracy.

IMPORTANT INFORMATION

Prescription lens addition to standard warranty disclaimer (See Warranty Below)

Due to the positioning of the lenses in Revision eyewear systems, it may be necessary to apply a correction factor to prescriptions designed for use in conventional prescription eyewear. The amount of the correction factor, if any, is calculated by the supplier of the prescription lens using the standard prescription information submitted by you. As a result, the strength of prescription lenses used in your Revision eyewear system may not be identical to the strength of the lenses in your standard prescription eyewear, but will provide for properly corrected vision.

It is very important to submit current, accurate prescription information when ordering prescription lenses for use with a Revision eyewear system. Failure to submit correct information regarding your prescription could result in blurred vision, eye strain, fatigue, and/or headaches.

Revision recommends that you obtain your Pupillary Distance measurement from a licensed eye doctor or optician. Many optical stores will provide this service free of charge.

Prescription lenses used in Revision eyewear systems are prepared at Revision's request by an independent, licensed provider of prescription lenses. Revision does not perform or offer to perform services as an optometrist or optician.
