## FRONT MOUNT

The BATLSKIN VIPER FRONT MOUNT is a lightweight, multi-purpose mount for the Advanced Combat Helmet with an interchangeable center piece system. Serving as a Night Vision Goggle (NVG) mount in a slim and easy to use design, the receiver component can be swapped to accommodate various NVG interface plates. The Front Mount enables seamless integration of the Batlskin Visor, Mandible Guards and rails. Tested in a wide range of operational venues, the Batlskin Front Mount delivers class-leading stability for NVG use and the crucial ability to up-armor when needed.

The Front Mount is a key component of the Batlskin Head Protection System, serving as the attachment point for the Visor and Mandible Guards.

## KEY TECHNICAL FEATURES

### BALLISTIC PERFORMANCE (V50)

- Mounted using supplied ballistic hardware that passes U.S. ACH 9mm FMJ impact tests

### WEIGHT

- Weighs only 2.9 oz (83 g) – size Medium

### CONSTRUCTION AND DESIGN

- Slim, lightweight and snag free design – Can be worn all day, every day
- Reinforced nylon construction with assembled aluminum NVG plate for strength and durability
- Compatible with widely used NVGs, such as the PVS-7 and PVS-14; upgradable receiver to use L-3 and ENVGiii NVGs.
- Designed for secure helmet mounting, preventing rotational axis movement
- Revision's NVG shock cord integrates with Front Mount to provide additional stability for NVG use
- External wing interface offers improved robustness to support the attachment of modular components
- Allows for quick donning and doffing of Visor and Mandible Guard
- Integrates with the Batlskin interlocking accessory rails providing increased sturdiness and stability
- Uses existing helmet holes – no new drilled holes required

### FINISH

- Standard colors with textured surface finish

### AVAILABLE SIZES

- Small, Medium, Large and X-Large

**BATLSKIN**

The ultimate protection from trauma – blunt force, blast and ballistic: B<sup>3</sup> Technology™ in a scalable, lightweight package that's fully modular and fully integrated. So you can tailor the system to the mission for peak performance.
