INTERLOCKING LONG RAILS

Revision's BATLSKIN VIPER INTERLOCKING LONG RAILS offer a system upgrade enabling quick and easy head borne accessory attachment. Offering the ability to tailor the helmet depending on the mission at hand, the rail system allows for cameras, lights, and other accessories to be outfitted. The rails have multiple entry points and accept widely used rail bases, such as the Desert Locust Goggle swivel clip, picatinny and winged rail bases.

The Interlocking Long Rail System consists of two rails which seamlessly integrate with the Batlskin Front Mount and can be used simultaneously with the Batlskin Visor and Mandible Guards.

KEY TECHNICAL FEATURES

BALLISTIC PERFORMANCE

- Mounted using supplied ballistic hardware that passes U.S. ACH 9mm FMJ impact tests

WEIGHT

- Weighs only 2.8 oz (80 g) – left and right rails, size Medium

CONSTRUCTION AND DESIGN

- Matches helmet shell curvature ensuring secure helmet mounting for accessory stability
- Design allows for easy, one-handed attachment of widely used rail bases
- Entry points along upper and lower dovetails enable multiple accessories to be mounted
- Accommodates O2 clip for use with oxygen masks
- Slim, lightweight and snag free design
- Uses existing helmet holes – no new drilled holes required

FINISH

- Standard colors with textured surface finish

AVAILABLE SIZES

- Small, Medium, Large and X-Large

BATLSKIN

The ultimate protection from trauma – blunt force, blast and ballistic: B³ Technology™ in a scalable, lightweight package that's fully modular and fully integrated. So you can tailor the system to the mission for peak performance.
