STINGERHAWK SPECTACLE

SAWFLY SYSTEM

DESERT/ASIAN LOCUST GOGGLE

BULLET ANT TACTICAL GOGGLE

WOLFSPIDER GOGGLE

1. Optician inserts prescription lenses into Rx Carrier
2. Soldier inserts Rx Carrier into Revision spectacle or goggle
3. Result: Corrected vision behind high-impact protection

A soldier's vision must be accurate in order to do his job properly. Over 30% of soldiers require corrective lenses to improve their eyesight, but wearing traditional eyewear under protective eyewear is not the optimal solution. The Revision Rx Carrier presents a rugged, convenient solution that works.

**REVISION'S RX CARRIER** – Designed to fit Revision's full line of military products, including the Sawfly® Spectacle System, StingerHawk™ Spectacle System, Desert Locust®/Asian Locust® Goggle Systems, Wolfspider® Goggle System or the Bullet Ant® Tactical Goggle System, this is an effective, efficient way to handle vision correction while providing high impact ocular protection.

#### KEY FEATURES

**RUGGED** – Carrier frame built for strength and durability

**FIELD-OF-VIEW** – Wide field-of-view. Carrier frame color does not distract or inhibit vision

**PRESCRIPTION READY** – Optician inserts personalized prescription lenses. We recommend polycarbonate and other high-impact material for lenses. Accommodates prescriptions up to ±11D

**INTERCHANGEABLE** – One size carrier fits the Sawfly Spectacle, the StingerHawk Spectacle, the Desert Locust/Asian Locust Goggles, the Wolfspider Goggle or the Bullet Ant Tactical Goggle

**CONVENIENT** – Secure “press fit” insertion positions corrective lenses optimally
