

Outstanding impact protection

Vermillion lens ideal for shooting

Rugged and durable

Prescription ready

SAWFLY SHOOTER'S KIT

Sawfly Shooter's Kit: Revision's Sawfly is proven to be the top performing impact eyewear system available.

THE SAWFLY SHOOTER'S KIT contains a vermillion lens which is ideal for the shooting range. The vermillion tint provides excellent color recognition and depth perception. It offers medium light protection and reduces glare under light cloudy or hazy conditions and under artificial light such as halogen and fluorescent sources. How does it work? The vermillion lens blocks out blue light which reduces contrast – the result is crisper targets for greater accuracy.

KEY FEATURES

THREE SIZES – Correct size ensures fit, comfort and optical performance

SUPERIOR BALLISTICS – High-impact system exceeds ANSI Z87.1-2010 & military ballistic impact requirements for spectacles ((MIL-PRF-32432 (GL)) & goggles (MIL-DTL-43511D, clause 3.5.10)

FLAWLESS OPTICS – Precision manufactured lenses ensure distortion-free vision, full side-impact protection and anti-fog performance

INTERCHANGEABLE – Lenses made of indestructible, optical grade polycarbonate that can be interchanged quickly for various light conditions and provide 100% protection from harmful UV-A, UV-B and UV-C rays

TOUGH – Scratch-resistant coating on both sides of lens; resists wide variety of chemicals, including DEET

COMMS-COMPATIBLE – Lean, extendable arms guarantee the utmost comfort, equipment ARMS compatibility and stay-put fit. Slimline ergonomically designed arms ensure hearing protection and head sets work as designed while the over molded underframe provides shock absorption and grip

RUGGED DURABILITY – Eyepro that lasts, performs and protects through all the rigors of combat – in a lightweight package that's just 1 ¼ ounces

PRESCRIPTION READY – Optional Rx insert is also compatible with StingerHawk®, Desert Locust® and Bullet Ant® Goggles.

TOUGH ENOUGH TO WITHSTAND A SHOTGUN BLAST FROM 16 FEET!

FIREARM – Maverick Model 88, 26 inch barrel with improved cylinder choke

AMMUNITION – Remington 12 gauge, 1 ounce #6 shot

VELOCITY – 1300 fps ± 30 fps (396 m/s ± 9 m/s) at 16 ft (5m)

RESULT – 25 strikes, no penetrations
