

The SnowHawk Cold Weather Goggle System

Collaborating with ANON, an industry leading snow sports brand, Revision developed a goggle that provides unmatched ballistic protection & performance in extreme weather conditions. The SnowHawk system includes a magnetically integrated balaclava which seamlessly connects to the goggle.

Features, Advantages & Benefits

FEATURES	ADVANTAGES	BENEFITS
OCUMAX PLUS COATING	OcuMax Plus coating on the inside and outer Lens protects against fogging and scratching	The SnowHawk's fog prevention features ensure peak performance and visibility in extreme cold climates
BREATHABLE BALACLAVA	Mesh over mouth and nose directs breath away from goggle	
AIR VENTS	Top and lateral forced air vents to provide constant airflow	
DUAL PANE LENS SYSTEM	Thermal gasket lens creates an insulated barrier to the cold exterior lens	Creating a complete facial seal, the Magnetic Integration balaclava stays seamlessly attached to the goggle ensuring no skin is exposed to the elements
ANON'S MAGNETIC FACEMASK INTEGRATION (MFI)	Magnetic Facemask Integration (MFI) ensures balaclava magnetically connects to the goggle	
HIGH IMPACT PROTECTION	Exceeds U.S. Military eyewear ballistic impact resistance requirements (MIL-PRF-32432)	Interchangeable, optical grade polycarbonate lenses shield eyes from unexpected fragments
COMFORT & FIT	Goggle is lightweight and comfortable with a sleek form factor	Design offers an improved fit which is ideal for both tactical operations and extended-use missions
COMPATIBILITY	Low-profile goggle design ensures compatibility with helmet, binoculars and night vision systems. The adjustable strapping system fits over the helmet or on head	No need to change or modify current in-service equipment, strapping system can accommodate head borne equipment
PRESCRIPTION READY	Compatible with Revision's Rx Carrier for prescription lenses	Easily accommodates prescription lenses up to ±11D
